

SMALL SEEDS BOX

The input shaft of the seed box has to do the number of turns stated per 1000m to give the approximat seeding range listed in the seeding charts. (kg/ha)

- MAKE SURE SEED BOX DRIVE TURNS CCW WHEN LOOKING AT-THE SPROCKET.
- The Davimac small seed box is designed to sow seed smaller than wheat or oat but not including wheat or oats. (the feed rollers will crack the seeds if the seeds are to large)

Row spacings	Low Turns per 1000 meters	High Turns per 1000 meters
100mm	17	67
125mm	22	84
150mm	26	100
175mm	31	118
200mm	35	135
225mm	40	151
250mm	44	168

It is recommended that the seed box be cleaned out when not in use and shedded.
